

Product Bulletin

Date: March 1, 2005
Subject: Mounting Bracket (71-06-0100)
Products Affected: CN320/CN330/CN3200/CN3300/CN1250
Effective: Immediately
Document Status: Final

Summary

The AP Mounting Bracket provides an easy, secure method for mounting a Colubris access point or integrated access point/gateway/controller to a horizontal or vertical surface. It is offered as a separately orderable accessory, \$45 list price.

Key Features:

- Slide-in/slide-out design for fast easy access point maintenance
- Security holes enable locking with padlock (not included)
- All mounting fasteners are concealed for security
- Attractive low profile, small footprint design
- Rugged metal construction

Description

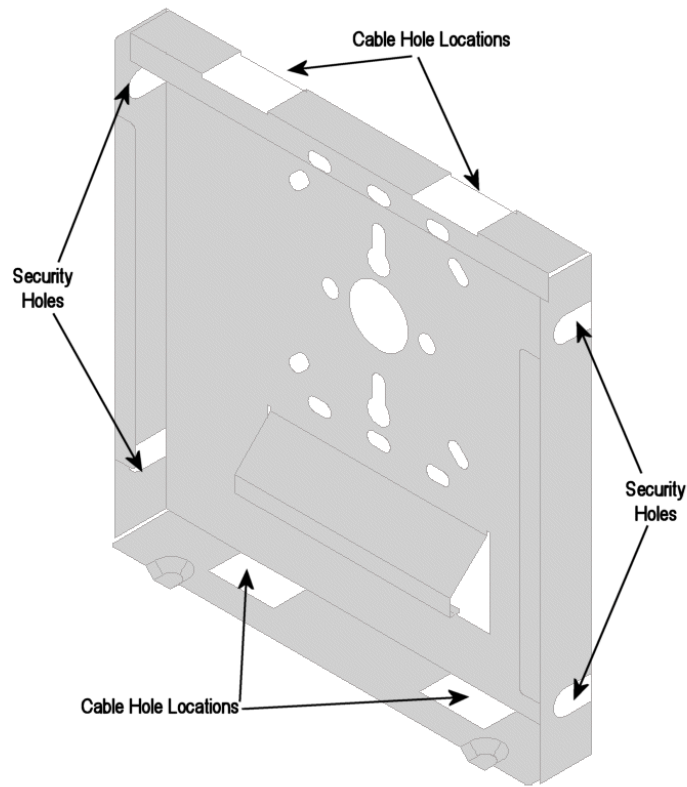

The mounting bracket enables easy, secure mounting of Colubris access points and integrated access point/gateway/controllers. Access points can readily slide-in and slide-out of the bracket for easy maintenance. The bracket also features security holes that can be used with a padlock (not included) to secure the access point to a wall or ceiling, making it ideal for use in public venues.

The bracket may be mounted to any flat drywall or wood surface, or it can be mounted to a standard electrical box, which can be used to conceal associated Ethernet cabling. It comes complete with fasteners appropriate for mounting to commercial drywall or wood surfaces.

It may be used with:

- CN320 Intelligent Access Point
- CN330 Dual Radio Access Point
- CN1250 Integrated Access Point/Security Gateway
- CN3200 Integrated Access Point/Access Controller
- CN3300 Dual Radio Access Point/Access Controller
