DUXBURY Modems
An Overview

Duxbury has been designing, manufacturing, importing and distributing modems since 1984 and their wealth of experience in this market has ensured and guaranteed superior performance when using a Duxbury modem in the South African environment. An innovator in the Local Data Communications industry, they introduced South Africa's first licensed 2400bps V.22bis modem, Duxbury was also first to market with V.32 and V.34 (33.6kbps) licensed modems.

Duxbury's family of 56K modems is widely available and fully compliant with the latest ITU V.92/V.90 specifications. This range is ideally suited to the burgeoning SOHO arena, and like Duxbury's full range of modems, is backed by the superior Duxbury service and a five-year warranty.

56k

Manufactured and distributed by:
