

GlobeTrotter **GT MAX “7.2 READY”**

- Wireless DSL-like speed up to 7.2 Mbps
- Worldwide connectivity with Multi-standard (HSDPA, UMTS, EDGE and GPRS) and Multi-band support
- Faster and more stable connections with two antennas and Advanced Receiver Technology
- Ultra compact design with patented retractable antenna
- Future proof field upgrade to HSDPA 7.2 Mbps
- Plug'n play with Zero-CD™ technology

About GlobeTrotter **GT MAX “7.2 READY”** (Models: GX 201 / GX 202)

GlobeTrotter GT MAX “7.2 Ready” is the next generation of wireless data card designed by Option to be compatible with mobile operator infrastructure equipment capable of supporting higher data rates of up to 7.2 Mbps. GlobeTrotter GT MAX “7.2 Ready” includes Advanced Receiver Technology (ART) offering the benefit of Receive Diversity and Receive Equalization. Both are essential for maximizing the benefits of HSDPA 7.2. Initially supplied with HSDPA 3.6, the GlobeTrotter GT MAX “7.2 Ready” is field upgradeable when the network is configured for HSDPA 7.2. Backward compatibility ensures HSDPA connections at lower data rates of 3.6 Mbps and 1.8 Mbps. The wireless data card has inherent support for 3G operation at 384 Kbps in conjunction with Quad band EDGE and GPRS.

GlobeTrotter GT MAX “7.2 Ready” is the first Option data card to use the Zero-CD™ patented technology. This means that it is no longer a necessity for the user to pre-install drivers or a software application in order to use the data card. GT MAX is a truly unique Plug ‘n Play solution: no user install, no user installed application, no driver CD. GlobeTrotter GT MAX brings worldwide broadband wireless capability to laptops and notebooks by combining triple-band HSDPA/UMTS with quad-band EDGE/GPRS technologies in its revolutionary PC Card package. The design of the GlobeTrotter GT MAX incorporates Option’s unique and patented “Butterfly” retractable antenna concept that frees you from the need to remove any part of your card from your notebook for transport.

Features

- Worldwide coverage through triple-band HSDPA/UMTS, quad-band EDGE/GSM
- Multimode HSDPA/UMTS/EDGE/GPRS/GSM card
- Advanced Receiver Technology incorporating Receiver Diversity and Equalization
- Patented Zero-CD™ Plug ‘n’ Play technology
- HSDPA and UMTS High-speed data (up to 7.2 Mbps) connectivity for mobile users
- Field upgradeable from 3.6 to 7.2 Mbps HSDPA
- EDGE/GPRS/GSM data (up to 247 Kbps) connectivity
- Transparent hand-over between UMTS and GSM/EDGE networks
- Compatible with nearly all popular notebook PC’s equipped with Type II PC card slot and Microsoft Windows™ operating system
- Transparent support for IPSec and VPN technology
- PCSC-driver for EAP-SIM and other 3-party applications in need of a Smart Card Interface
- Support for third party applications such as Video Telephony (3GPP 3G-324M, H.324, H264 Baseline Video), SIP, SMS, IM, MMS, Internet and e-mail
- Comprehensively tested on infrastructures and networks worldwide
- Future proofing through Flash Memory technology
