

NETGEAR Layer 3 Managed Switch Installer Course

● Objective

To provide delegates with the knowledge to be able to discuss the feature's and technologies of the NETGEAR Layer 3 Switch range's and to perform an installation and configuration of the main products, as detailed above.

● Featured Products

- FSM7326P, FSM7328S, FSM7352S, GSM7312, GSM7328S, GSM7352S

Delegates will also gain an awareness of the following:-

- Switch modules, Fibre GBICs and stacking kit

● Class Description

This advanced switching installer course focuses on Layer 3 Management and Routing, designed to deliver maximum throughput and flexibility where businesses need it. This two day technical course begins with an overview of Layer 3 switching and supported technologies and moves on to an in-depth look at feature's and functionality; including routing, port configuration, traffic management and network administration.

● Class Content

Introduction to Layer 3 Switching
Supported Technologies
Layer 3 Products & Feature's
Installation & Initial Configuration
Ports (Stacking & Aggregation) & VLANS
Layer 3 Configuration & Routing
OSPF, Advanced IP Configuration
QoS & Traffic Management

● Who Should Attend

Installers, systems engineers and support staff responsible for the deployment and support of NETGEAR Layer 3 managed switches

● Prerequisites

A general understanding of the following will be expected:-

- General networking
- LAN technologies
- Operation of bridging/switching and routing/L3 switches
- IP networking and addressing, including the use of subnetting

Course Duration

2 Days

Course Cost

R2 998.00 Excl. VAT Per person
