Rajant BreadCrumbs®

Powerful Functionality in a Compact Form

Rajant's Kinetic Mesh® network is unlike any other wireless mesh system on the market today, providing fully mobile broadband connectivity that is simple, instantaneous, and fault-tolerant for any application.

The network's power lies in Rajant's wireless BreadCrumbs: the compact, lightweight, industrial-grade nodes that form this agile, adaptable wireless infrastructure.

BreadCrumbs have unique capabilities that enable them to perform flawlessly in even the most hard-to-network environments and make them ideal for deployment across ever-moving operations.

Peer-to-Peer Functionality
Every Rajant BreadCrumb can hold multiple simultaneous connections, over multiple frequencies, with other nodes in the mesh, eliminating the need for a controller node while adding network reliability.

Self-Optimize without Intervention
InstaMesh enables the nodes to adapt in real-time to quickly or constantly moving network elements. No connections have to be broken for new ones to be made, providing for resilient mobility.

Deployable as Fixed or Mobile Nodes
Compact, lightweight BreadCrumbs can be affixed to static equipment or deployed directly on moving assets – so machines and personnel can take connectivity with them wherever they go.

Support Seamlessly Scalability
If new BreadCrumbs are added, they automatically begin meshing with neighboring nodes and further strengthen the network by providing additional paths to send traffic.

Infused with InstaMesh® Intelligence
All BreadCrumbs have Rajant's patented InstaMesh networking software onboard, which dynamically evaluates and directs traffic via the best available path(s) at any given moment.

Perform in Extreme Conditions
The industrial-strength design of the nodes, coupled with IP67-rated dust-tight and water-tight enclosures for most models, allow them to operate continuously in virtually any environment for years.

BreadCrumbs can easily integrate with and enhance existing network infrastructure, including third-party satellite, wired, point-to-point wireless, point-to-multipoint wireless, or can be deployed ad hoc to bring connectivity where no communications infrastructure yet exists.

Rajant BreadCrumb Portfolio
Find the Right Radio for the Right Function

Use the chart below to compare the features and functionality of our wireless BreadCrumb offerings.

	Peregrine	LX5	Hawk	ME4	ES1	KM3	JR3	DX2
Typical Radio Configuration	Quad 2x2 MIMO transceivers	Dual 2x2 MIMO transceivers plus dual 1x1 SISO transceivers	Dual 2x2 MIMO transceivers	Dual 2x2 MIMO transceivers	Dual 2x2 MIMO transceivers	Dual 2x2 MIMO transceivers	Single 1x1 SISO transceiver	Single 2x2 MIMO transceiver
Number of Radios	4	3 or 4	2	2	2	2	1	1

Dimensions	264.9 x 253.7 x 46.2 mm (10.43 x 9.99 x 1.82 in)	197 x 220 x 29 mm (7.75 x 8.665 x 1.125 in)	264.9 x 253.7 x 46.2 mm (10.43 x 9.99 x 1.82 in)	189 x 95 x 51 mm (7.46 x 3.75 x 2.00 in)	138.735 x 143.154 x 57.15 mm (5.462 x 5.636 x 2.25 in)	155 x 149 x 41 mm (6.079 x 5.830 x 1.575 in)	177 x 44 x 44 mm (6.97 x 1.73 x 1.73 in)	108 x 43 x 40 mm (4.252 x 1.693 x 1.575 in)
Weight	2946 g (6 lbs 7.9 oz)	1850 g ± 150 g (4 lbs 1.3 oz ± 5.3 oz) (weight depends on transceiver configuration)	2600g (5 lbs 13 oz)	1162 g ± 100 g (2 lbs 9 oz ± 3.5 oz) (weight depends on transceiver configuration)	1074 g +/- 100 g (2.37 lb +/- 0.22 lb) (weight depends on transceiver configuration)	440 g ± 10 g (15.5 oz ± 0.4 oz)	193 g (6.8 oz)	123 g ± 10 g (4.4 oz ± 0.4 oz)

BreadCrumb Benefits:
Network Infrastructure for Today's Interconnected, Mobile World

Rajant BreadCrumb nodes are purpose-built to reliably enable voice, video, and data communications instantly and without fail almost anywhere. They readily form a fully redundant web of meshed connections to deliver more reliability, mobility, and resiliency using less infrastructure than other wireless networking options like Wi-Fi or LTE.

Rajant BreadCrumbs have been proven in the field for two decades to deliver on the promises of:

- **Robust fault tolerance:** no single point of failure & ability to work around interference

- **High bandwidth and low latency:** nodes have hundreds of potential paths to direct traffic

- **Total, 'never-break' mobility:** enables M2M communications, autonomy, and more

- **Cost-effective network scalability:** requires minimal technical resources to manage and expand

- **Military-grade network security:** every node has multiple cryptographic options

Not sure what BreadCrumb is best for your application?

We're ready to help you further assess your network requirements and will recommend the appropriate solution for your needs.
