

Cynet Mobile Device Management

Protect Every Device.

**Cynet Mobile Threat Protection.
Ensure Security, No Matter Where.**

Cynet Mobile Threat Protection (MTP) keeps Android, iOS, and ChromeOS devices secure against both known and zero-day threats whether they are connected or offline. With Cynet's MTP, own security peace of mind with on-device protection, automated remediation, and seamless integration into any existing infrastructure.

How Cynet Protects Mobile Devices:

Unified, AI-Powered Protection

Protects workstations, servers, and mobile devices from malware, ransomware, and advanced threats using Endpoint Protection, Device Control, Mobile Security, and Posture Management, detecting and resolving risks early.

On-Device Defense

Detect and remediate mobile threats directly on the device. Protect against malicious apps, phishing links, network-based attacks, and risky configurations without needing cloud connectivity.

Seamless Integration

Easily connect to existing Mobile Device Management (MDM) and Enterprise Mobility Management (EMM) tools for unified policy enforcement, visibility, and compliance reporting.

Complete Visibility

Gain insight into your mobile fleet with device analytics, OS risk reporting, application inventory, and behavioral data that help identify and address vulnerabilities before attackers do.

Automated Remediation

Stop mobile threats the moment they are detected with automated response actions that do not rely on end-user intervention.

Additional Capabilities

App Risk Detection and Mitigation

Identify and block malicious or risky mobile applications before they compromise users.

Mobile Forensics

Access detailed forensic data to understand attack sources and device-level impact

Trusted Results (MITRE 2025)

- ✓ 100% Protection
- ✓ 100% Detection Visibility
- ✓ 100% Technique Coverage
- ✓ Zero False Positive Detections

“Cynet’s comprehensive offering provides the visibility and protection necessary to guarantee a safe, secure, and reliable network.”

Phillip Bickelhaupt,

Director of Technology, Wisconsin Rapids Public Schools

Ready to take control of your mobile security?

Cynet delivers unified mobile threat protection that reduces complexity, eliminates blind spots, and secures every device with on-device defense and automated response.

About Cynet Partnership:

In an era where complexity slows progress, we’ve joined forces with Cynet to deliver clarity and confidence. Our unified, AI-powered cybersecurity platform equips organizations with seamless protection and continuous SOC support, transforming the way security is experienced.
