

Unified. AI-Powered. Expert-Backed.

Complete protection in one intuitive, powerful platform.

Cynet's unified platform removes the high cost and complexity of effective cybersecurity.

Our unified platform delivers native detection, prevention, correlation, investigation, and response across endpoints, mobile devices, users, networks, SaaS, and cloud applications. Get full visibility, powerful detection, and proven protection - right out of the box.

Cynet's unified platform natively provides full threat vector protection for:

Endpoints

Protects workstations, servers, and mobile devices from malware, ransomware, and advanced threats using Endpoint Protection, Device Control, Mobile Security, and Posture Management, detecting and resolving risks early.

Email

Monitors email for malicious attachments and links, blocking risky senders and domains to minimize the risk of this attack entry point with Email Security.

Third-Party Systems

Detects threats across third-party systems such as Active Directory, Firewalls, and SaaS/Cloud apps with Extended Detection and Response technology.

End-to-End Automation

Accelerates response with fully automated investigation and remediation, driven by built-in incident workflows and advanced Security Automation, Orchestration, and Response.

Networks

Detects and prevents stealthy attackers from accessing and moving across networks, while blocking connections to malicious sites with Network Analytics and Port Scanning.

Users

Continuously monitors user behavior to detect and block malicious insiders or compromised accounts with User Behavior Analytics, Deception, and Domain Filtering.

SaaS/Cloud Apps

Automatically identifies, prioritizes, and fixes security risks across all your SaaS and Cloud applications with SaaS & Cloud Security Posture Management technologies.

Additional Capabilities

Centralized Log Management

Collect high priority log data to quickly and accurately uncover threats lurking across your environment with Centralized Log Management technology.

Access to 24x7 Security Experts

Provides continuous protection with a team of cybersecurity experts who monitor environments and rapidly respond to threats through Managed Detection and Response.

Trusted Results (MITRE 2025)

- ✓ 100% Protection
- ✓ 100% Detection Visibility
- ✓ 100% Technique Coverage
- ✓ Zero False Positive Detections

“Cynet’s comprehensive offering provides the visibility and protection necessary to guarantee a safe, secure, and reliable network.”

Phillip Bickelhaupt,

Director of Technology, Wisconsin Rapids Public Schools

Ready to simplify and strengthen your security?

in partnership with Cynet, we deliver a complete cybersecurity platform that eliminates silos and maximizes value across your technology investments.

About Cynet Partnership:

In an era where complexity slows progress, we’ve joined forces with Cynet to deliver clarity and confidence. Our unified, AI-powered cybersecurity platform equips organizations with seamless protection and continuous SOC support, transforming the way security is experienced.
