

Customizable Cybersecurity Protection for Every Organization

Cynet delivers enterprise-grade security with minimal effort.

Cynet gives organizations the confidence that every part of the environment is protected. With the industry's only unified, AI-powered platform backed 24x7 by MDR security experts, Cynet delivers enterprise-grade security and maximum protection, without the enterprise burden.

Protect Essential Endpoint Protection for security teams with less complex environments. BEST FOR: IT and security teams with basic security needs. SECURITY OUTCOMES: Block common threats, secure endpoints at scale, and simplify delivery.	Elite Endpoint, 24x7 MDR security, and automation for more complex environments. BEST FOR: Security teams operating in regulated or higher-risk environments. SECURITY OUTCOMES: Compliance reporting, 24x7 management, and zero operational overhead.	All-in-One Fully-managed 24x7 expert protection across all managed environments. BEST FOR: Security teams with more complex environments needing broad coverage without tool sprawl. SECURITY OUTCOMES: Unify operations, 24x7 management, strengthen protection, and broaden coverage.

Customization Options

Compare what's included in each plan, and tailor Cynet to your client to the unique needs of your environment with flexible customization options:

✓ Included + Add-On

Cynet Unified, AI-powered Platform

Cynet brings together every critical layer of cybersecurity into one AI-powered platform that works around the clock to keep organizations safe.

CyAI

Sites, Groups, Policy & Audit Management
Users, Roles, MFA & SSO Management
License & Usage Management
Dashboard & Reports
API, RMM & PSA Integrations

✓ Included + Add-On

Endpoint Protection Platform (EPP)

Powered by MITRE-proven performance, Cynet EPP uses multiple prevention layers to automatically stop ransomware, fileless malware, lateral movement, credential theft, and zero-day exploits.

Endpoint Detection and Response (EDR)

Cynet's EDR goes beyond traditional endpoint systems by combining signals across endpoints, networks, and users, along with deception technology to improve visibility, accuracy and protection across the entire attack surface.

Network Detection and Response (NDR)

Cynet detects stealthy threats and anomalous behaviors across your network, analyzing interactions with devices and users to provide high fidelity threat detection.

Identity Security

Cynet leverages native endpoint and identity telemetry for instant detection and automated response, stopping privilege escalation and lateral movement.

Email Security

Cynet Email Security protects Microsoft 365, Google Workspace, and other cloud email gateways with always-on detection, prevention, and automated response.

✓ Included + Add-On

Endpoint Security Posture Management (ESPM)

Combines industry-leading detection and risk mitigation to quickly find and fix endpoint vulnerabilities before exploitation.

Deception Technology

Cynet deploys realistic decoys and credentials to expose attackers early and stop lateral movement, credential misuse, and stealthy threats.

SaaS & Cloud Security Posture Management (SSPM & CSPM)

Automatically finds, prioritizes, and fixes risks across SaaS and cloud environments—delivering full visibility and continuous protection without extra tools.

Mobile Security

Keeps Android, iOS, and ChromeOS devices secure against both known and zero-day threats whether they are connected or offline.

Security Orchestration, Automation, and Response (SOAR)

Cynet SOAR puts security on autopilot by unifying detection, investigation, and response across the entire environment.

Centralized Log Management (CLM)

Automatically collects and analyzes high-priority logs to uncover hidden threats, accelerate investigations, and simplify compliance, all from a single platform.

Why Choose Cynet

Loved by customers, validated by analysts (G2, Gartner Peer Insights)

AI-powered platform, faster detection and automation

MITRE ATT&CK-proven performance

Unified coverage across more threat vectors

24x7 MDR security experts

“Cynet has made it so much easier to focus on other things in the environment instead of worrying about our cybersecurity initiative. If you really want that piece of mind, you want that single pane of glass, and that single point of access for support, Cynet is really a solution to consider, and I would recommend it hands down to anyone.”

Jeff Rudd, Director of Technology
